 Last Updated Friday, 07 September 2007

The BugnuX team is proud to release the final version of BugnuX2007, after many sleepless/partyless nights. The key features of this version are that the default Window Manager is Enlightenment 0.17. Yes, E17 is still in beta, but it has some very nifty features. Since it is in beta, we have also included the latest stable version of Fluxbox, as an alternative, just in case...

The other important feature is that we have our own repository (fully compatible with PCLinuxOS 2007) with all the testing tools(marathon, jacareto, CurlLoader), E17, OPenBox, FluxBox, Rox, idesk, etc. For info on adding the repository to your PCLinuxOS click on Read More.. below.

Please use the forums for any feedback.

Downloads

LiveCD: BugnuX2007 - LiveCD download

LiveUSB: BugnuX - LiveUSB shop

Salient Features in this release

- Removed KDE completely
- Enlightenment 0.17 (E17) is default window manager
- Added Fluxbox RC 3 as alternative window manager
- VirtualBox added for virtualization
- Added possiblity to boot from a USB stick using the CD as start medium
- Added feature for the export of the "home" folder to an USB flash device
- Thunar is file manager
- Added Ad-block plus as firefox addon
- Created own repository with most of the packages that have been added
- wbar added
- adesklets added

For more detailed information on changes in this release, please refer to the Change Log.

{tab=Repository}

This repository is compatible with PCLinuxOS, just add this line to the APT list of repository, in the file /etc/apt/sources.list :

```
rpm http://www.bugnux.org/pub/linux/bugnux/apt/ bugnux/2007 main extra nonfree E17
```

If you want to add it via synaptic, these are the settings: URL: <http://www.bugnux.org/pub/linux/bugnux/apt/> Distribution: bugnux/2007 Section(s): main extra nonfree E17

List of packages available currently in the BugnuX Repository:

```
# curl-loader-0.40
# curl-loader-debug-0.40

```

These applications comes with BugnuX 2007 LiveCD:

Office
Networking & Internet
Multimedia

- OpenOffice.org 2.2:
 - * Word Processing
 - * Spreadsheet
 - * Database
 - * Presentations
 - * Web Design
 - * Formula editor
 - * Drawing
- Gnumeric: Spreadsheet
- Dayplanner: Calendar
- gLabels: Label Designer

- Mozilla Firefox: Web Browser
- Browser-Plugins: Flash, Java,
 - MozPluggger, Ad-block Plus, LiveHttpHeaders, All-in-one-sidebar, etc.... Refer to Testing Tools section to see all addons packaged.
- Sylpheed Claws: E-Mail
- Pidgin: Multi-Messenger
- Xchat: IRC Chat
- gFtp: FTP-Client
- Liferea: News-Reader
- Skype: Internet-Telephonie
- Gtk-Gnutella: File Sharing
- Chestnut-Dialer: Modem-Connection
- VNC: virtual Network Connection
- Putty
- PyNeighbourhood: Windows-Networks
- Exaile: mp3-Player, Internet Radio
- Mplayer: Multimedia-Player
- gXine: Multimedia-Player
- Xmms: mp3-Player
- Grip: CD-Ripping
- GnomeBaker: CD Burning
- Streamtuner: Internet Radio
- Realplayer: Multimedia-Player
- TV Time: watching TV

GraphicsGames Accessories

- Evince: pdf-Viewer
- Gimp: Photo editing
- FLPhoto: Photo editing,Viewer
- GQview: Picture Viewer
- GTKam: Digicam-Tool
- Sodipodi: Vector Graphic
- Xsane: Scanning

- FloboPuyo
- Frozen Bubble
- Gweled
- IceBreaker
- LBreakout 2
- LMarbles
- PySol
- Tower Toppler
- Xskat
- Thunar: File manager
- Mousepad: Notepad
- Calculator
- Xarchiver: Archiving
- Alltray
- Appfinder

Security/RescueSystem programs Other

- Firewall
- nmap
- Gparted
- partimage
- Testdisk
- My-Sys
- rkhunter
- redo-mbr
- PCLinuxOS Control Center
- Synaptic Software Manager
- Terminal
- Midnight Commander
- Net Applet
- Entrance
- Tilda
- Gnome-Volume-Manager
- Enlightenment
- FluxBox
- Adesklets + Adesklets Manager
- Bluefish Html-Editor
